Background

The challenges to sustainable development over the past years have been driven by a set of global trends, such as recent discoveries in nanotechnology and genetic engineering, changing demographics profiles, unpredictable environment occurrences (e.g., earthquakes and tsunami), changing economic and social dynamics, and rising inequalities. These global trends have made the world of organizations increasingly uncertain and disruptive, yet still offer opportunities for those able to innovatively link and collaborate the advancement of science, technology, and humanities to tap into areas that could overcome the challenges to sustainable development. From this, we could see that the interaction between science, technology and humanities is a new helix for sustainable development, and certainly, collaborating them becomes the aim of all leaders, practitioners and researchers who are committed to the achievement of sustainable development goals. Unfortunately, much of the activities and research up to now have treated these three areas as separate entities and have failed to fully define their roles in a unity application. Therefore, identifying a set of integrated approach to handle this issue is a must.

Since 2014, Udayana University has conducted an annual meeting to address many critical issues that have related to science, technology, and humanities, and their impacts on innovativeness. Now, more than ever, we need scholars and practitioners, who are aware of the importance of collaborating science, technology, and humanities towards sustainable development, to share their perspectives and explore the solutions in order to help communities, organizations and government to contribute to the global sustainable development goals. We provide you a platform to discuss this and other issues at the International Conference on Science, Technology and Humanities (ICoSTH) 2019, and we cordially invite you to come to our conference that will take place at the Patra Bali Resort & Villas on 14-15 November 2019. We look forward to seeing you in Bali!
